STRATIGRAFIA - T.2

SCALA 1 : 100

Pagina 2/2

Riferimento: COMUNE DI BRUSCIANO (NA)

Sondaggio: T.2

Località: INDAGINI GEOGNOSTICHE E GEOFISICHE PER LA VARIANTE AL P.R.G.

Quota: 27,00

Impresa esecutrice: TRIVEL SONDAGGI S.A.S.

Data: MAGGIO 2004

Coordinate: VIA GOBETTI

Redattore: DOTT.GEOL. GIOVANNI DE FAL

Perforazione: CAROTAGGIO CONTINUO

Profondita' (ms)	Tempi verticali (ms)		Velocita' intervallo (m/sec)	
	Tp	Ts	Vp	Vs
2	5.6	12.3	357	163
4	11.1	19.8	364	200
6	15.4	27.9	465	253
8	19.1	34.8	540	290
10	22.4	40	606	385
12	25.4	45	667	400
14	28.5	50.4	645	370
16	31.1	54.7	769	465
18	33.2	58	952	606
20	35.1	61.1	1052	645

Presenza di 3 livelli sismici nel foro d'indagine.

DOWN-HOLE n° 4 (Pozzo 5)

Parametri sismici relativi alla prova DOWN-HOLE numero 4

Profondita' (m)	Tempi verticali (ms)		Velocita' intervallo (m/sec)	
	Tp	Ts	Vp	Vs
2	5	10.5	400	190
4	9	18	500	267
6	11.6	22	769	500
8	14	25.6	830	556
10	16.5	29.4	800	526
12	19.1	33.8	869	455
14	21.6	37.8	800	500
16	23.8	41.4	909	606
18	27	48.3	625	290
20	29.5	51.2	950	690

Si nota un'inversione di velocita' sismica tra i geofoni 8 e 10, tra i geofoni 12 e 14 e tra i geofoni 16 e 18 per la presenza di materiali meno veloci sottoposti a materiali piu' veloci.

Presenza di 5 livelli sismici.
